

ABSTRACT

The present invention provides compounds of Formula (I):

I

or a stereoisomer or pharmaceutically acceptable salt form thereof, wherein the
 5 variables A, B, L₁, L₂, X¹, X², X³, X⁴, R⁴, R⁵, R¹³, R¹⁴, R¹⁵ and R¹⁶ are as defined
 herein. The compounds of Formula (I) are useful as selective inhibitors of serine
 protease enzymes of the coagulation cascade and/or contact activation system; for
 example thrombin, factor Xa, factor XIa, factor IXa, factor VIIa and/or plasma
 kallikrein. In particular, it relates to compounds that are selective factor XIa
 10 inhibitors. This invention also relates to pharmaceutical compositions comprising
 these compounds and methods of treating thromboembolic and/or inflammatory
 disorders using the same.
